Top 20 High Priority Leads

Lead-level information has been excluded from this public portfolio version due to data confidentiality.

Key Insights :

- 1) 63 high-priority businesses were identified with strong potential for digital transformation and lead conversion.
- 2) Website Development (108 businesses) emerged as the most demanded service, indicating a significant digital presence gap among local businesses.
- 3) Social Media Marketing (86 businesses) was the second most required service, highlighting the need for stronger online engagement and brand visibility.
- 4) The Restaurant, Clothing, and Healthcare sectors represent the largest concentration of potential leads in the dataset.
- 5) A considerable number of businesses have either inactive social media accounts or no social media presence, creating opportunities for digital marketing services.
- 6) Several businesses possess active social media profiles but lack professional websites, indicating potential demand for integrated digital solutions.

Recommendations :

- 1) Prioritize outreach to high-priority businesses requiring multiple services such as Website Development, Social Media Marketing, and GMB Optimization.
- 2) Offer bundled digital growth packages combining website development, social media management, and Google Business Profile optimization.
- 3) Focus initial lead generation efforts on restaurants, clothing retailers, healthcare providers, hotels, and banquet halls, as these categories show the highest service demand.
- 4) Target businesses with no website but active social media presence, as they are more likely to understand the value of digital marketing services.
